
Controlled Substance Policy

No Guarantee of Prescribing

An appointment with Living Life on Purpose Health & Wellness does not guarantee that a controlled substance will be prescribed, continued, replaced, increased, or renewed. Controlled medications are prescribed only when the treating clinician determines that they are clinically appropriate and legally permitted.

Clinical Review and Safety

Controlled-substance prescribing may require review of your medical history, current medications, prior treatment, pharmacy history, relevant records, and other information needed to make a safe prescribing decision.

Prescription Drug Monitoring Program

When required or clinically appropriate, the clinician may review the applicable prescription drug monitoring program before prescribing or renewing a controlled medication.

Additional Requirements

Depending on the medication and clinical circumstances, the practice may require medical records, laboratory or other testing, an in-person evaluation, specialist involvement, a treatment agreement, medication monitoring, or other safeguards before prescribing or continuing a controlled substance.

Telehealth Prescribing

Controlled-substance prescribing through telehealth is subject to applicable federal and state law, professional standards, prescribing rules, and any in-person evaluation requirements in effect at the time of care. These requirements may change, and telehealth availability does not guarantee eligibility for a controlled-substance prescription.

Patient Responsibilities

Patients must provide accurate information about medications, pharmacies, other prescribers, medical conditions, and substance use; follow the agreed treatment plan; use medications only as directed; and comply with reasonable monitoring and follow-up requirements.

Early, Lost, or Stolen Medication

Requests for early refills or replacement of lost, stolen, damaged, or otherwise unavailable controlled medication are reviewed individually and may be declined. Filing a police report or other documentation does not guarantee replacement.

Unsafe or Inappropriate Use

The practice may decline, modify, taper, or discontinue controlled-substance prescribing when clinically appropriate or when there are safety concerns, nonadherence, evidence of misuse or diversion, conflicting prescriptions, or failure to complete required monitoring or follow-up. When appropriate, alternative treatment or referral may be discussed.

Emergencies

This practice does not provide emergency care. If you are experiencing a medical emergency, call 911 or go to the nearest emergency department.

Contact

For non-emergency administrative questions, contact **813-771-3233** or info@livinglifeonpurposehealth.com. Mailing address: **7901 4th St. N #36153, St. Petersburg, FL 33702**. Clinical medication questions should be submitted through the secure patient portal.
